CAREER SUMMARY

I have a passion for creating efficient and reliable server side applications with a strong foundation with programming languages such as Python Django, I am committed to continuous learning and experimentation, staying up to date with latest advancements and technologies. I take pride in designing and developing robust and scalable solutions that meet the needs of clients and end-users. I am a strong communicator and work well in a team environment, collaborating with colleagues to deliver high quality products that exceed expectations.

TECHNICAL SKILLS

Languages: Python

Databases: MySQL

Frameworks: Django

Server Management: Railway, Netlify

Tools: Postman, Github

SOFT SKILLS

- | | |
|---------------------------|-----------------------------|
| ❖ Analytical Thinking | ❖ Project Management Skills |
| ❖ Client-Centric Approach | ❖ Receptive to Feedback |
| ❖ Communication | ❖ Result Oriented |
| ❖ Attention to Detail | ❖ Adaptability |
| ❖ Problem Identification | ❖ Continuous Learning |

WORK EXPERIENCE

Univelcity

April 2022 – March 2023

Backend Development Intern: During this Period, I actively contributed to the creation and enhancement of robust web applications through hands-on experience in backend coding, database management, and collaborative teamwork. My responsibilities encompassed various facets of backend development, under the mentorship of experienced professionals, to achieve optimal application functionality and user satisfaction.

Duties

- Assisted in writing clean and efficient backend code, implementing features and functionalities
- Gained hands-on experience in designing and managing databases, including creating schemas and ensuring data integrity
- Worked closely with frontend developers and designers to integrate frontend components with backend functionalities, ensuring a cohesive and user friendly application
- Contributed to technical documentation, including API documentation and database schemas
- Participated in agile development processes, including daily stand-ups, sprint planning and retrospective meetings

PERSONAL PROJECTS

- **Estate Agency** – I spearheaded the development of a dynamic real estate platform using Django, integrating features like property listing, user accounts and a blog. I successfully deployed and optimized its performance on railway for maximum accessibility.
- **Tailor Manager** – This comprehensive tailor management system utilizes Django, offers tailors an efficient digital platform to streamline their tasks. Its user-friendly, allowing tailors to input measurements for both genders, manage client records, issues receipts effortlessly, and swiftly access individual client information
- **Quiz API** – This is a Django quiz app includes a web based API for users to take quizzes and see their results. Built with Django Rest Framework and JWT authentication, it offers end points for creating quizzes, taking them, viewing results and accessing categorized questions. Designed to be flexible user-friendly and easily integrable with other systems.
